What began in 1987 as a sister internship to the Summer Experience in Farm Management has since grown into an entire equine program at Miner Institute. Mr. Miner strongly believed in high quality education and registered livestock, so the versatile Morgan Horse was a natural fit. The stables and herd are used to demonstrate good farm, breeding, and training practices, as well as to provide the foundation of learning for the Summer Experience in Equine Management students. Year-round events have established Miner Institute as the place to go with equine-related questions. Seminars, workshops, clinics, and one-on-one training provide vital services to the area's horse industry.

Guest Speaker:  
Karen Lassel

Head of Equine  
Management at  
The Miner Institute
